*Media Manager is an efficient tool for managing and handling tapes. Media Manager uses the TSM Disaster Recovery Manager to maintain the volume states of your tapes. With Media Manager you won't face the problem of lost tapes. You will always be able to locate tapes with the help of Media Manager.*

## What is Media Manager?

Media Manager is an enhancement which seamlessly interfaces with Tivoli Storage Manager.

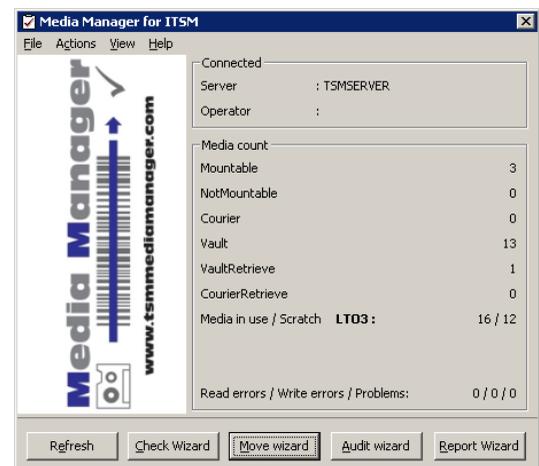

Media Manager is an efficient tool for managing and handling tapes. Media Manager uses the TSM Disaster Recovery Manager module to maintain the volume states of tapes.

Media Manager helps to eliminate lost tapes.

## Overview

Media Manager supports your company's tape administration. The software registers, administers and controls the physical movement in- and outside your company's building.

By using barcode technology Media Manager can guarantee full traceability of your tapes. Barcodes provide a particular reliable and time efficient method to enter information into your TSM server.

Main program interface of Media Manager.

Media Manager is certified by IBM Tivoli as a "Ready for Tivoli" product

## Testimonials

*Erwin Mertens, Makro Belgium*

“Every day we bring the copy tapes to our branch-offices. The disaster recovery procedures are essential to our company. Therefore we want to be sure that the right tapes get to the vault. With media Manger this work is reduced to a couple of minutes a day”.

*Ton Zwart, Manager Datacenters and Storage Nuon*

“Moving tapes between our different data centers always gave us problems. With Media Manager our system administrators can work fast and efficient, this saves us time and money”.
